The big question of our time when it comes to careers is how do we keep on a course in the world of work when everything around us is changing so quickly? The answer is to keep your eye on your ultimate destination-what is most important to you. You will need to know where to look for information as things change around you. And in an ever changing world, you have to know where to find new options for yourself when you need them.

Dealing with Change						
1. Define adaptability.						
face o positi	a look at the case studies on can be categorized as <b>persor</b> ve and negative ways they c mine the type of change for	nal, work-related or global, could deal with the change i

## Predicting Trends, p. 141

Trends don't come in a vacuum. It is often possible to analyze the history of a trend and make predictions about where the trend is leading. Successful business people are often good at predicting where a trend will lead. However, as the pace of change accelerates, it is becoming more difficult to predict future trends-therefore we must be cautious about how the future is to be depicted.
