

GROUP ACTIVITY

- A family in your neighbourhood lost their home during the night to a fire and lost all of their possessions. Luckily, everyone in the family got out safely although they were quite shaken by the whole ordeal. The family did not have insurance.
- There was a mom, a teenage boy (age 16) and a 6 month old baby girl. A local community group has donated money to help get the family back on their feet – **you and your team have been asked to prepare a list of 12 items for each family member as well as a (20 item) list for the household starting with the most important needs.**
- At the end you may suggest some “wants” (no more than 5 per person and 10 for the household), that the community may consider giving additional funding for after the family’s needs have been met initially.
